

LWS Project Scientist Status Meeting
02-February-2006
O. C. St. Cyr

***TRANSFORMATION [Re-Re-Redux]**

Rumors continue that the Science Mission Directorate at HQ will reorganize, with Earth-Sun splitting into an Earth Division and a Heliophysics Division.

HQ is working with Dr. Mona Kessel of GSFC to become an LWS detailee.

There will be a HQ Division retreat in mid-April, followed by the MOWGs and the Divisional Advisory Committee. Dr. Joe Mazur will become the LWS MOWG Chair.

***[Heliophysics Roadmap](#)**

The Roadmap is in the final stages of editing, and it should be available for the Spring AGU. It will be renamed the Heliophysics Roadmap.

***[Solar Dynamics Observatory \(SDO\)](#)**

SDO continues fabricating flight components. A combined HMI-AIA science team meeting and SWG will be held February 13-17 in Monterey.

The HMI flight model is observing the Sun from Palo Alto. EVE is sending their flight model to NIST for calibration. All of the AIA CCDs are now in hand. E/PO SIDS monitors are being built.

***[GEOSPACE](#)**

We remain in a black-out period while proposal evaluation is taking place.

***[SENTINELS](#)**

A Sentinels STDT splinter meeting will be held March 2-3 in Greenbelt area to conclude writing the science portion of the report.

***[Solar Probe](#)**

Risk mitigation studies continue with the Engineering team.

***[Space Environment Testbeds](#)** (SET)

***[Targeted Research & Technology \(TR&T\)](#)**

Steering Committee meeting last week in Greenbelt. The budget should be released next week, and then TR&T awards for this year will be announced.

***[LWS Education and Public Outreach \(E/PO\)](#)**

Headquarters review of all SMD E/PO activities is underway.

***OTHER**

Other topics discussed during meeting:

Reports from Jackman and Georgoulis about their TR&T focus team activities.
